

# About This Download

## PRINTING

The majority of our downloads are formatted to print on 8.5x11” paper, unless otherwise noted. You may print at home or at a local print shop. We recommend using a recent version of Adobe Acrobat PDF Reader to view and print your files. It is available for free online. If you run into problems with pages being cut off, select “fit to page” in your print dialogue box to make sure it fits on your page correctly.

To print large page sizes (anything larger than 8.5x11”), we recommend going to a local print shop like Kinko’s, Staples, AlphaGraphics, etc. and ask them to print your file as a black and white “engineer print” or “blueprint.” These larger prints are big and fun, and fairly inexpensive.

If the staff at your print shop asks you about your rights to reproduce this work, you will find a copyright release below. Or you can tell them you downloaded these files for personal use from [comefollowmefhe.com](http://comefollowmefhe.com) and they can look us up to see you do have rights to print the copies.

## COPYRIGHT RELEASE

Downloading this file implies you accept that it is for personal use only. You, as the subscriber, have the right to print this file as many times as you want for your family and for your own Primary class (not your entire ward Primary). You cannot share this file with others or email to anyone. Please be honest in using this file. Redistributing, selling, or posting this file on the internet is strictly prohibited without first gaining permission from the author. If you are not the original subscriber, please purchase our materials before making copies.

# Nephi was Commanded to Build a Ship

Read 1 Nephi 17:8 with your family and discuss how Nephi was commanded to build a ship, but that was something he had never done before. Ask your family if they have ever been asked to do something they didn't know how to do. For example: Have they ever had to do a math problem at school they didn't know how to do? Have they ever had to come up with an idea for a science experiment they didn't know how to do? Talk about how Nephi learned what he needed to do to build a ship. Point out that he first had faith and asked the Lord where he could find the things he needed to make the tools for building a ship. Nephi was faithful and knew the Lord would help him, just like He'll help you!

Then have fun folding a 3D boat together and seeing if it will float in your sink or bathtub. All you will need is one piece of paper per boat. Scan or click on the QR code below to follow a simple folding tutorial. You could also make a small flag for your boat with a toothpick and washi tape or paper. To make your boat more waterproof, rub the bottom of your boat with a candle. The wax will rub off onto the paper and make it waterproof!
